

**Figure 14. Oxbow Overlook.** The Little Missouri River makes a huge bend as it turns east in the North Unit. Eventually, the river will abandon the large U-shaped portion of the channel and flow in a more direct course, leaving an oxbow. NPS Photo by Dave Krueger.

**Figure 15. Shelter at Riverbend Overlook.** The Civilian Conservation Corps used medium-grained, cross-bedded sandstone from a local quarry to construct various structures in the park, such as this shelter in the North Unit. NPS photo by Dave Krueger.
